

THE PREFERENCE OF PROFESSIONAL CHEMISTS

Now your REACTOR application is very easy with Labo Refrigerated and Heating Circulators which are able to work at $-80\text{ }^{\circ}\text{C}$ / $+250\text{ }^{\circ}\text{C}$!

For chemistry companies conducting R&D and quality control process, your best assistant is Labo Refrigerated-Heating Circulators, so the temperature value can be kept exactly and the desired level.

To check the temperature of the sample, you can work in the liquid with temperature set in the tank or you can work by pumping the liquid into another cell.
